ZERO-DEFLECTION ROLLER BLIND

&EVOLVE® ZERO

ZERO-DEFLECTION ROLLER BLIND

Evolve® Zero, is an innovation in zero-deflection roller blinds, enabling wide blinds without oversized tubes.

Meet Evolve® Zero

OVERVIEW

- Zero deflection at any width
- Sizes up to 5m wide
- Unique range of 6 hardware finishes
- Zoomtech® technology inside

SYSTEM DETAILS

Evolve® Zero incorporates Zoomtech® gravity compensation technology into our popular Evolve® roller blind system. The result is a zero-deflection roller blind which makes what was once impossible possible.

Zoomtech® is a worldwide patented groundbreaking technology inserted within the Evolve® Zero roller tube. Following years of research and development, and using complex structural engineering physics, the outcome is beautifully simple and simply beautiful.

Evolve® Zero roller blinds can shade windows up to 5m wide in a single span using a roller tube that is only 44mm in diameter. Even the largest areas of glazing can be covered without needing to split into multiple blinds, and without needing to use a large 'industrial scale' roller system.

The benefits of having consistent design and finish of Evolve® roller blinds throughout an entire property, regardless of window size, are obvious from an aesthetic viewpoint. And the benefits increase further when it comes to concealing blinds in a blindbox or ceiling pocket.

Space is always at a premium for concealing blinds. Evolve® Zero makes it possible to fully conceal even very large blinds when open, and have beautiful looking fabric when the blind is closed.

USES & APPLICATIONS

Evolve® Zero has been specifically designed for electric blinds. There is a full range of market-leading wired or wireless motors available. These can be controlled via switch, radio remote, app, full smart building integration, or a combination of these. There are virtually no limits to what you can achieve.

There is little benefit adding the Zero system to blinds under 2.0m wide. Blinds 2.0m–2.5m wide will benefit from the system, depending on factors such as the drop of the blinds and the type of fabric used. Blinds at 2.5m wide and over are quite simply transformed by Zero technology.

Designed to be beautiful, built to last, simple to install. Every Evolve® Zero roller blind is hand built in Britain in our own factory. Just for you.

DESIGN & INNOVATION

&EVOLVE® ZERO SYSTEM FEATURES

BRACKET COVER OPTIONS

- Bracket covers available in all 6 colour options
- Conceals the motor head and end bearing

HARDWARE AVAILABLE IN 6 COLOURS

- White, Black, Silver, Champagne, Anthracite and Oyster
- Custom powder coating also available

ALSO AVAILABLE WITH CASSETTE

- 80mm, 100mm and 125mm cassette sizes
- Available in all standard hardware colours
- Can be custom powder coated

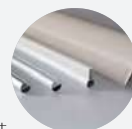

CONTROL OPTIONS

- 240V motorised
- Low Voltage or battery motorised
- Radio or hardwired
- Integration with home automation & BMS

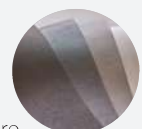

HEMBAR OPTIONS

- Ellipse 43 fabric pocket hembar
- Luxury 46 rectangular alu hembar
- Type 2 teardrop hembar

FABRIC OPTIONS

- Sunscreen fabric for glare control with views out
- Dimout fabrics for light filtering and privacy
- Blackout fabrics for room darkening
- Sheer fabrics for privacy and light diffusion
